

# LeBit -Apps for Microsoft Business Central

Work together with Multi-Company Mandantory's

LeBit MultiCompany for easy merge the VAT from different Mandantory clients

In Business Central there is currently no possibility for a group mandantory to merge the VAT from different clients so that he can make a statutory input tax return of his legally related clients. This is now possible in a very simple way with this extension.

It is also possible to consolidate Mandantory's with different currencies at any exchange rate.

The screenshot displays the configuration page for a group mandantory in Microsoft Business Central. The title bar shows 'KONZERNMANDANTENKARTE' and 'DE'. The page is divided into sections: 'Prozess' (Wechselkurse, Weitere Optionen), 'Sachkonten', and 'MwSt.-Konsolidierung'. The 'Wechselkurse' section contains a table of fields for configuring the consolidation process, including Code, Name, Mandantenname, Währungscode, Wechselkursstabelle, Konsolidierung %, Startdatum, Enddatum, Datenquelle, Dateiformat, and Letzte Ausführung. The 'MwSt.-Konsolidierung' section includes a toggle switch for 'MwSt. Konsolidierung' and a field for 'Letzte MwSt.-Postennr.'.

Companies that want to consolidate their accounts and taxes have an easy to use tool to manage this data.
