Years of Experience: 25

Shelley has over twenty-five years of experience working in both the private and public sectors maintaining regulatory compliance. Shelley has worked with both domestic and international governments initiating and implementing policies for large and small projects. While at Chicago Bridge and Iron Company (CBI) Shelly served as Enterprise Analytics (EA) Program Director and Global Health Safety & Environmental (HSE) Director. As HSE Director, she was responsible for CB&I's HSE performance at manufacturing sites and projects worldwide. She was responsible for developing, implementing, and monitoring HSE vision, strategy, policies, training, and procedures that met regulatory requirements and promoted sustainable company development. Shelly has been published in trade publications including the *Journal of Occupational and Environmental Medicine*, the *Healthcare Management Review*, and the *Journal of Occupational Rehabilitation*.

At TIC, Shelley is responsible for developing, communicating, and monitoring Tank Industry Consultants extensive Health and Safety program. She conducts in-house and field safety training and supervises medical surveillance plan in accordance with all applicable OSHA regulations.
